SUMMARY

Data Engineer with 4+ years of experience building scalable data pipelines, cloud analytics platforms, and enterprise data systems across consumer packaged goods(CPG) and healthcare industries. Skilled in improving data reliability, streamlining data integration, and supporting business decisions through analytics, business intelligence, and AI solutions.

TECHNICAL SKILLS

Programming & Engineering: Python, SQL, JavaScript, Shell Scripting, Linux, System Design

ML & Visualization: Pandas, NumPy, scikit-learn, PyTorch, Seaborn, Matplotlib, R, Tableau, Power BI

Databases & Data Engineering: BigQuery, MySQL, NoSQL, PySpark, Airflow, Kafka, dbt, ETL/ELT, Data Warehousing

Cloud & DevOps: GCP, AWS, GitHub, Docker, Kubernetes, CI/CD Pipelines, SDLC, Monitoring, Process Automation

Certifications: GCP - Associate Cloud Engineer, SQL for Data Science - Coursera

EXPERIENCE

Rochester Institute of Technology | Rochester, NY

August 2024 – December 2025

Teaching Assistant

- Mentored 30+ students in SQL, database modeling, warehousing, and analysis, improving assignment completion rates by 25%.
- Streamlined grading workflows for assignments and projects, reducing professor workload by 15 hours per week.
- Facilitated weekly office hours to resolve complex SQL query optimization and data issues, improving course support quality.

Nagarro | Pune, India

March 2024 – June 2024

Senior Engineer

- Diagnosed and resolved critical data discrepancies across healthcare pipelines, boosting downstream reporting accuracy by 25%.
- Guided a team of 3 engineers in structuring and refining ETL workflows for faster, more reliable data processing.
- Coordinated cross-functional data issue resolution, reducing weekly turnaround time from 8 hours to 3 hours.

Accenture | Mumbai, India

December 2020 – March 2024

Data Engineer

- Built Python and PySpark ELT pipelines on BigQuery to support daily sales reporting, maintaining 99% data accuracy.
- Modeled dimensional schemas across large-scale data environments to enable scalable analytics and reporting.
- Produced Tableau dashboards that cut manual reporting effort by 40% and broadened access to business insights.
- Tuned SQL queries and Python automation scripts, accelerating data retrieval by 30% and saving 10+ hours weekly.
- Implemented an end-to-end data warehousing pipeline using Talend, AWS, and Apache Airflow, reducing ingestion time by 45%.
- Established CI/CD processes and data quality frameworks throughout the development lifecycle for seamless source data ingestion.
- Deployed data validation, unit tests, and automated monitoring alerts to ensure pipeline reliability and SLA management.

PROJECTS

NeuroExplain: Explainable Brain Tumor Analysis | Deep Learning, LLMs, RAG

January 2026 – April 2026

- Constructed an end-to-end 3D U-Net analysis system achieving a 0.90 Dice score for accurate tumor segmentation.
- Integrated LLMs for RAG-based clinical reports achieving 92% alignment with complex medical imaging findings.
- Applied Grad-CAM to surface explainable AI features and align model attention with specific clinical regions.

Amazon Review Sentiment Analyzer | ML, NLP, Python

January 2025 – May 2025

- Developed an NLP pipeline with BERT, achieving 92% sentiment accuracy across 50K+ reviews for customer insights.
- Performed aspect-based sentiment analysis using LLMs and TF-IDF to surface recurring product feedback patterns.
- Released a sub-second inference GUI using Python capable of processing 1,000+ reviews for real-time customer analysis.

Flight Network Dashboard | Neo4j, JavaScript, Node.js

February 2025 – April 2025

- Generated interactive Neo4j dashboards with D3.js to visualize 46K+ routes for complex network analysis.
- Configured dynamic Cypher queries to enable real-time user-driven graph updates and improved data usability.
- Enhanced UI performance by 40% using JavaScript zoom and pan features, improving overall user navigation.

EDUCATION

Rochester Institute of Technology | Rochester, NY

August 2024 – May 2026

Master of Science in Information Technology and Analytics, GPA: 3.87/4.0

- Award: Debbie Cahn Memorial Scholarship Awardee

PUBLICATION

- Published research paper titled “Reasoning LLM-Based Security Policy Generation for the I2NSF Framework” at the KICS Winter Conference 2026 in collaboration with Sungkyunkwan University (SKKU), South Korea.
